## Financial Information Assurance

The last couple of years have been a series of financial highs and lows and the result has been a increased value in confidence and trust. Successfully meeting the standards of the GLBA is a necessity to ensure continued client confidentiality and therefore client trust and the health of your business.

### Protecting Consumer Lending Information

Bringing its expertise in privacy and security to the ever changing needs of business, Interhack has created packages specifically addressing the needs of companies who are striving to uphold the standards of the GLBA. These services include but are not limited to the following:

**Risk Analysis.** Identifying and scoring risk to determine where to direct compliance efforts isn't easy. Our risk assessment service shows your critical assets, the impact of vulnerability, the cost and benefit of safeguards, and helps you decide when to assume risk, when to mitigate it, and when to transfer it.

**Information Security Assessment.** Using the National Security Agency's (NSA) INFOSEC Assessment Methodology (IAM), we show your organization's information security posture in at least eighteen areas.

**System Security Evaluation.** Hands-on evaluation ensures effective implementation of technical safeguards. Our standards for review come from the U.S. National Institute for Standards and Technology (NIST).

**Penetration Testing.** We offer a set of "live-fire" tests for incident detection capability and response effectiveness.

**Web Assurance.** Our annually-renewable regularly service evaluates your public or private web sites for compliance to policy and GLBA rules.

**Training.** If you're interested in on-site training or are looking for a GLBA Security seminar from an authoritative source in your area, talk to us.

### Why Interhack?

Interhack's expertise simply cannot be found elsewhere. Since 1995, we've been delivering real solutions to real needs. Our research has been cited throughout the world, including government guidelines, university courses, and industry standards groups. Today, we combine our world-class expertise and personal service to bring the best available solutions to our clients all over North America. Don't accept second-hand advice. Get it straight from real experts.
