## Information Security Checkup

Information systems have provided tremendous opportunities for businesses—and the attackers who target them. How much should be spent on defense of information, and where should that money be spent?

Interhack's Information Security Checkup can answer those questions for you. This checkup examines your organization's overall capability in six, twelve, or all eighteen of the baseline information security areas identified by the U.S. National Security Agency (NSA).

<i>Area</i>	<i>Minimal</i> \$4,995	<i>Common</i> \$7,495	<i>Basic</i> \$9,995
